INDEX OF VOLUME XIV

Andô, Tsuyoshi. *Weakly compact sets in Orlicz spaces*, 170

Barry, J. E., *see* Petty and Barry
Bing, R. H. *Embedding circle-like continua in the plane*, 113
Bleicher, M. N. *Lattice coverings of n-space by spheres*, 632
Block, Richard. *Trace forms on Lie algebras*, 553
Brauer, Richard, and Leonard, Henry S., Jr. *On finite groups with an abelian Sylow group*, 436
Brown, R. K. *Univalent solutions of* $W'' + pW = 0$, 69
Butler, John B., Jr. *Perturbation of the continuous spectrum of systems of ordinary differential operators*, 359

Cargo, G. T. *Angular and tangential limits of Blaschke products and their successive derivatives*, 334
Cowling, V. F., and Miracle, C. L. *Some results for the generalized Lototsky transform*, 418
Crittenden, Richard. *Minimum and conjugate points in symmetric spaces*, 320

Dean, David W. *Projections in certain continuous function spaces*, 385
Dulmage, A. L., *see* Johnson, Dulmage and Mendelsohn

Eberlein, W. F. *An integral over function space*, 379
Erdélyi, A., and Sneddon, I. N. *Fractional integration and dual integral equations*, 685
Erdös, P., and Rogers, C. A. *The construction of certain graphs*, 702

Fell, J. M. G. *Weak containment and induced representations of groups*, 237
Fulkerson, D. R., and Ryser, H. J. *Multiplicities and minimal widths for (0, 1)-matrices*, 498

Glicksberg, Irving. *Uniform boundedness for groups*, 269
Gordon, Basil, Mills, W. H., and Welch, L. R. *Some new difference sets*, 614
Gorenstein, Daniel. *On finite groups of the form ABA*, 195

Halperin, Israel. *Transcendental elements in continuous rings*, 39
Hayes, Charles A., Jr. *A theory of integration*, 577
Helfenstein, H. G. *Analytic H-surfaces*, 329

Johnson, D. G., and Kist, J. E. *Prime ideals in vector lattices*, 517
Johnson, Diane M., Dulmage, A. L., and Mendelsohn, N. S. *Connectivity and reducibility of graphs*, 529
Jónsson, Bjarni. *Arithmetic properties of freely α-generated lattices*, 476
Jónsson, Bjarni, and Kiefer, James E. *Finite sublattices of a free lattice*, 487

Kiefer, J. *An extremum result*, 597
Kiefer, James E., *see* Jónsson and Kiefer
Kist, J. E., *see* Johnson and Kist
Kleisli, Heinrich. *Homotopy theory in abelian categories*, 139

Laufer, P. J., and Tomber, M. L. *Some Lie admissible algebras*, 287
Lees, Milton. *Asymptotic behaviour of solutions of parabolic differential inequalities*, 626
Leonard, Henry S., Jr., *see* Brauer and Leonard

Macdonald, I. D. *On a class of finitely presented groups*, 602
Marcus, Marvin, and May, F. C. *The permanent function*, 177
Marcus, Marvin, *see* Moyls, Marcus and Minc

Mauldon, J. G. *Sets of equally inclined spheres*, 509
May, F. C., *see* Marcus and May
McCarthy, P. J. *Irreducibility of Bernoulli polynomials of higher order*, 565
Mendelsohn, N. S., *see* Johnson, Dulmage and Mendelsohn
Mills, W. H., *see* Gordon, Mills and Welch
Minc, Henryk, *see* Moyls, Marcus and Minc
Miracle, C. L., *see* Cowling and Miracle
Moyls, B. N., Marcus, Marvin, and Minc, Henryk. *Permanent preservers on the space of doubly stochastic matrices*, 190

Namioka, Isaac. *On certain onto maps*, 461
Nicol, C. A. *Some formulas involving Ramanujan sums*, 284
Noonan, B. *Representations subduced on an ideal of a Lie algebra*, 293
Noonan, B. *The construction of representations of Lie algebras of characteristic zero*, 304

Petty, C. M., and Barry, J. E. *A geometrical approach to the second order linear differential equation*, 349

Ray-Chaudhuri, D. K. *Some results on quadrics in finite projective geometry based on Galois fields*, 129
Read, R. C. *Contributions to the cell growth problem*, 1
Read, Ronald C. *Euler graphs on labelled nodes*, 482
Rogers, C. A., *see* Erdös and Rogers
Royster, W. C. *Extremal problems for functions starlike in the exterior of the unit circle*, 540
Rudin, Walter. *A strong converse of the Wiener-Levy theorem*, 694
Ryser, H. J., *see* Fulkerson and Ryser

Sachs, David. *The lattice of subalgebras of a Boolean algebra*, 451
Santaló, L. A. *On the measure of sets of parallel linear subspaces in affine space*, 313
Scherk, Peter. *Osculating spaces*, 669
Shapiro, Victor L. *Symmetric exterior differentiation and flat forms*, 79
Sion, Maurice. *Approximate continuity and differentiation*, 467
Sledd, W. T. *The Gibbs phenomenon and Lebesgue constants for regular Sonnenschein matrices*, 723
Sneddon, I. N., *see* Erdélyi and Sneddon
Steinberg, Robert. *Generators for simple groups*, 277

Tomber, M. L., *see* Laufer and Tomber
Tomiuk, Bohdan J. *Structure theory of complemented Banach algebras*, 651
Tutte, W. T. *A census of planar triangulations*, 21
Tutte, W. T. *A census of Hamiltonian polygons*, 402
Tutte, W. T. *A census of slicings*, 708

Vanstone, J. R. *A generalization of Finsler geometry*, 87
Vanstone, J. R. *The general static spherically symmetric solution of the "weak" unified field equations*, 568

Welch, L. R., *see* Gordon, Mills and Welch
Wonenburger, Maria J. *The Clifford algebra and the group of similitudes*, 45
Wonenburger, Maria J. *Study of certain similitudes*, 60

Yang, C. T. *On non-orientable closed surfaces in euclidean spaces*, 660
